36TH ANNUAL IMP CONFERENCE AND DOCTORAL COLLOQUIUM

September 1–4, 2020
Örebro, Sweden

Sustaining and Energizing in the IMP Spirit
Sustaining and energizing in the IMP spirit entails drawing on previous endeavors to drive the development of a sustainable future with a special focus on research on business-to-business markets, business networks, interaction and business relationships to create a sustainable economy within planetary boundaries.

While we especially welcome submissions within this theme, the conference is open also for general papers dealing with IMP issues, business networks and interaction in general.

Center for Sustainable Business | CSB is the Örebro University center for research in sustainable business and business ethics. The purpose of CSB is to do research and development and to offer education in the fields of circular economy, business ethics, transparency and sustainable value chains. Our vision is inspired by the UN Sustainable Development Goals.

Sweden is a leading nation in sustainable business, energy and transportation. Sweden aims at becoming a first permanent World Fair for a sustainable society including a green energy sector, a fossil-free transportation sector, conscious consumers and responsible business forming the foundations for a sustainable economy. To this end companies and business corporations, public sector organisations, government agencies and academic institutions collaborate to find pathways to a sustainable future. We are confident that your visit in Örebro in the heart of Sweden will provide great opportunities to learn more about Sweden's ambitious goals and the research at CSB to support them, as well as many memorable cultural and culinary experiences.

The conference is hosted by the Center for Sustainable Business | CSB at Örebro University, Sweden, and co-arranged by Örebro University School of Business and BI Norwegian Business School.
